DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:
2. A) Treated subject afflicted with different diseases: cystic fibrosis, claim 15; chronic bronchitis, claim 16; primary or secondary ciliary dyskinesia, claim 17; pneumonia, claim 18; and sinusitis, claim 19.
3. B) Administering step: inhalation, claim 20; transbronchoscopic lavage, claim 21.
4. C) The salt or salts employed in the method: potassium nitrate, claim 45; potassium gluconate, claim 46; potassium iodide, claim 47; potassium bromide, claim 48; potassium phosphate, claim 49; and potassium bicarbonate, claim 50.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from each of the given groups for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1, 14, 31-44 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1617

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shengjun Wang, Ph.D. whose telephone number is (703) 308-4554. The examiner can normally be reached on Monday-Friday from 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreeni Padmanabhan, can be reached on (703) 305-1877. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4556.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
